OUR STORY

Our journey started when I noticed that my 24 month old son's eyes were not aligning correctly. Our trip to the ophthalmologist confirmed Accommodative Esotropia.

His condition Hyperopia is a result of a small eye, which caused his eyes to strain so much that they crossed and eventually one eye became lazy.

The only correction was to wear thick convex lenses and to wear an eye patch to prevent a lazy eye known as Amblyopia.

The limited choice of frames on the market at the time with nose pads were only in metal.

They were heavy and bulky and constantly kept falling off his face. Compliance was poor as my son refused to wear them due to the discomfort and weight. His condition worsened.

There was nothing available that could cater for a small child's head with a flat bridge.

My disappointment was such that I was compelled to make his frames on my own.

This sparked the beginning of Tomato Glasses : a company and product born out of the affection and love I have for my child. His vision improved and with the help of surgery his vision is now normal.

I am glad I did not give up on him and ever so grateful that the Tomato Glasses helped him.

I am also humbled to know that my passion and love for my son is now helping and supporting other children and parents across the globe that require custom fitted, lightweight and comfortable glasses. Children can now leave these spectacles on, with amazing success and great comfort. Tomato Glasses are frames that fit to a child's face rather than the child fitting the frame.

We, Tomato Glasses, will continue to make children's frames so that we can make children and their parents happy.

Non-Slip! Safe! Adjustable!

TOMATO GLASSES FEATURES

01 DURABLE GLASSES

1. The frames are made using non-toxic materials that are approved by the FDA.
2. The frames are very flexible, display excellent elasticity and do not break easily.

02 COMFORTABLY FITTING GLASSES

1. The frames are incredibly light: only 6 to 11g in weight.
2. There is a cushion on the tip of the frames that matches the complex curves of the ears and will not create pressure points.

Weight by type

Baby 6.3-6.8g | Kids 7.0-9.5g | Junior 8.5-10g | Young 9.4-11.5g | Active 8.5-10g

03 NON SLIP GLASSES

The bridge of the glasses matches the curve of the nose and therefore holds the glasses comfortably in place and prevents them from slipping down.

04 ADJUSTABLE TEMPLE LENGTHS

It is easy and simple to adjust the length of the temples. To shorten them, remove the ear tip and cut off the excess length. Replace ear tips and secure these in position using the screws. To lengthen the temples, pull the ear tips back and secure in place with the screws.

05 ADJUSTABLE NOSE PAD HEIGHTS

The nose pads can be attached to three points of the frame (five points on the baby range frames). As every child's face is unique, this feature allows the correct placement and height to be achieved for each child.

06 A STANDARD HEAD STRAP

All Tomato Glasses frames come with a head strap which attaches to the ear tips. They have been designed to prevent the glasses from slipping even with high powered lenses. The head strap provides security when running and jumping, making Tomato Glasses great for active children. They are also perfect for children with sensitive ears.

Baby A

A very flexible frame for the utmost comfort
which is highly adjustable to
accommodate a baby's rapid growth.

NOSE PAD FITTING KIT

Further research has indicated the need to cater for a variety of nose shapes. Therefore, we have developed a range of different sized nose pads, Baby fit (B1, B2, B3), Asian fit (A1, A2, A3, A4, A5) and Wide fit (W1, W2, W3).

All nose pads are interchangeable on frames and the fitting kit stores all nine sizes of nose pad.

This kit will allow optometrists and opticians to custom fit the frames to each child, therefore, offering the best customer service.

Nose Pad Fitting Kit

B SERIES (BABY)	 <p>B1 TYPE</p> <ul style="list-style-type: none"> ① external width 22mm ② internal width 8mm ③ height 8mm 	A SERIES	 <p>A1 TYPE</p> <ul style="list-style-type: none"> ① external width 25mm ② internal width 10mm ③ height 7mm 	W SERIES	 <p>W1 TYPE</p> <ul style="list-style-type: none"> ① external width 23mm ② internal width 11mm ③ height 8mm
	 <p>B2 TYPE</p> <ul style="list-style-type: none"> ① external width 22mm ② internal width 8mm ③ height 9mm 		 <p>A2 TYPE</p> <ul style="list-style-type: none"> ① external width 25mm ② internal width 10mm ③ height 7mm 		 <p>W2 TYPE</p> <ul style="list-style-type: none"> ① external width 25mm ② internal width 13mm ③ height 8mm
	 <p>B3 TYPE</p> <ul style="list-style-type: none"> ① external width 22mm ② internal width 8mm ③ height 10mm 		 <p>A3 TYPE</p> <ul style="list-style-type: none"> ① external width 27mm ② internal width 12mm ③ height 7mm 		 <p>W3 TYPE</p> <ul style="list-style-type: none"> ① external width 26mm ② internal width 15mm ③ height 8mm
	 <p>A4 TYPE</p> <ul style="list-style-type: none"> ① external width 25mm ② internal width 10mm ③ height 7mm 				
	 <p>A5 TYPE</p> <ul style="list-style-type: none"> ① external width 25mm ② internal width 10mm ③ height 7mm 				

THE RELATIONSHIP BETWEEN THE TYPES OF NOSE PADS AND FITTING RESULTS

If the frame sits too far away from a child's eyes, a wider nose pad should be used (e.g. replace a W1 for a W3 nose pad).
 If the frame sits too close to eyelashes then the above spacer kit can be used to create a greater space.

FOR INFANTS (B1,B2,B3), PLEASE REPLACE IT WITH THE LOWER NUMBER.

FUNCTION OF A4, A5 NOSE PADS

The A4 and A5 nose pads sets raise the eyeglass frame further up.

SPACER KIT

CONTENTS

- 1 2mm / 2 set
- 2 3mm / 2 set
- 3 4mm / 2 set

Our Research and Development team have created a Spacer Kit.

It is designed to create space between the lenses and a child's eyelashes or face when using high powered lenses.

TOMATO GLASSES CASSETTE AND ACCESSORIES

- Accessories are included in the Tomato Glasses cassette.
- The Baby frames have more accessories in their packs.
- Very convenient for storing parts.

Contents

- frame · strap · extra nose pads · extra tips
- extra tip screws · driver · fabric pouch · user guide

All employees at Tomato Glasses are committed to better vision for infants and children.

All of our employees are diligently working to deliver new ideas to improve vision for infants and children.

“Let every child see the world clearly.”

“Every child should be able to study, to exercise, and to play freely without any restraints.”

“Every child is precious, and we hope every child to grow up healthy.”

With these kinds of thoughts in mind, our employees are relentlessly striving together to make better products.
