Tomato Glasses began with the heart of a father.

Shortly after his first birthday, my son was diagnosed with strabismus caused by farsightedness. The doctor prescribed glasses and patching therapy, but he constantly refused to wear them. While continuous wear was essential for his treatment, we couldn't find a single pair anywhere that properly fit a toddler.

That was the moment I made a choice :

"If it doesn't exist in the world, I'll make it myself."

That very first frame, crafted with love for my son, became the beginning of Tomato Glasses.

Thanks to those glasses, he successfully completed his treatment. But I realized this couldn't just remain our family's story. I wanted to help other children and parents facing the exact same struggle.

As my son grew, our glasses evolved alongside him.

With every stage of his growth, we created larger sizes, but one principle has remained unchanged from day one :

A pair of glasses must never slip down.

What started as specialized eyewear for children has naturally expanded to adult frames, growing right along with the kids we serve.

Today, my son still wears the glasses his father made.

And every day, we continue to craft non-slip eyewear so the people you cherish most can see the world with effortless comfort.

Features of Tomato Glasses

Non-Slip. Safe. Perfectly Fitted.

Optimal vision begins with a frame that stays perfectly in place.

01

Safety & Durability

Engineered with safety in mind for complete peace of mind.

- FDA-Approved Non-Toxic Materials : Premium materials that minimize skin irritation.
- Exceptional Flexibility & Impact Resistance : Built to withstand active use.

02

Custom Fitting & Non-Slip Design

Designed with adjustable nose pads and temple lengths to custom-fit every user's face, ensuring the glasses stay in the ideal optical position.

- 6-11g Ultra-Lightweight Frame : Exceptionally lightweight and comfortable fit.
- Adjustable Temple Length: Customizable in 3 mm increments.
- Adjustable Nose Pad Height : 3-step adjustment (5-step for Baby series).
- Wide Variety of Interchangeable Nose Pads : 11 different types available.
- Adjustable Vertex Distance : 3 spacer sizes to optimize the distance between lenses and eyes.

03

Enhanced Stability

The included headband strap keeps the glasses securely in place during various everyday situations :

- Active Daily Use : Perfect for playing and sports.
- High-Diopter Lenses : Prevents heavy lenses from slipping down.
- Occlusion Therapy : Holds frames steady during patching therapy.

04

Optimized for Myopia Control Lenses

For functional myopia control lenses from leading lens manufacturers, maintaining the correct optical alignment is essential.

Tomato Glasses are specifically engineered to support both standard lenses and myopia control functional lenses.

Features such as secure fitting, adjustable nose pads and temples, an ultra-lightweight design, and the included headband strap help maintain the precise position required for functional lenses.

A premium lens delivers its maximum benefit only when paired with the right frame.

Young A

An Innovative Structure Built for High-Diopter Lenses

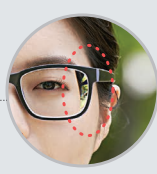

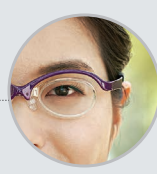

Engineered with Tomato Glasses' proprietary design, the lens frame locks seamlessly into the base frame, with the nose pad screw tightly securing the entire front structure in place.

We rethought frame architecture from the ground up to minimize the weight, thickness, and aesthetic compromises that high-diopter lens wearers have long accepted.

The Young A embodies Tomato Glasses' dedicated engineering—pushing the boundaries of high-diopter prescriptions.

Young A frame for High Prescription Lenses

Resolve the appearance problems caused by the high prescription lenses!

Resolve eyeglasses' thickness and weight problems caused by the high prescription lenses!

Keep all the features of Tomato Glasses, especially about the non-slipping characteristic!

FITTING KIT

An exclusive accessory set designed for Tomato Glasses, allowing easy replacement to match each user's unique nose bridge height and contour.

When the standard nose pad does not fit comfortably, swapping it with an optimal type enhances overall fit and customer satisfaction.

< Package Contents > 11 Nose Pad Types (27 pieces in total)

- B-Type (3 types) : Optimized for infant and baby nose shapes.
- A-Type (5 types) : Tailored for lower nose bridges.
- W-Type (3 types) : Tailored for higher nose bridges.

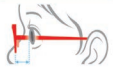

Dedicated Clear Case :

Transparent design for easy viewing of contents.

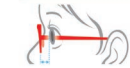

B SERIES (BABY)	 B1 TYPE ① external width 22mm ② internal width 8mm ③ height 8mm	 B2 TYPE ① external width 22mm ② internal width 8mm ③ height 9mm	 B3 TYPE ① external width 22mm ② internal width 8mm ③ height 10mm
	 A1 TYPE ① external width 25mm ② internal width 10mm ③ height 7mm	 A2 TYPE ① external width 25mm ② internal width 10mm ③ height 7mm	 A3 TYPE ① external width 27mm ② internal width 12mm ③ height 7mm
	 A4 TYPE ① external width 25mm ② internal width 10mm ③ height 7mm	 A5 TYPE ① external width 25mm ② internal width 10mm ③ height 7mm	
W SERIES	 W1 TYPE ① external width 23mm ② internal width 11mm ③ height 8mm	 W2 TYPE ① external width 25mm ② internal width 13mm ③ height 8mm	 W3 TYPE ① external width 26mm ② internal width 15mm ③ height 8mm

Fitting Adjustment Guide by Nose Pad Type

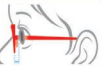

B3/A1/W1

B2/A2/A4/A5/W2

B1/A3/W3

A wider distance between the nose pad arms brings the lenses closer to the eyes. If the glasses sit too far from the eyes, replace the nose pads using the guide below :

- **Low & High Bridge Series (A1-A5 & W1-W3) :**
If too far from the eyes → Switch to a higher number.
- **Baby Series (B1-B3) :**
If too far from the eyes → Switch to a lower number.

Features of A4 & A5 Nose Pads

A2

The pad arms of the A4 and A5 are vertically longer than the A2, allowing the frame to sit higher on the wearer's face.

A4

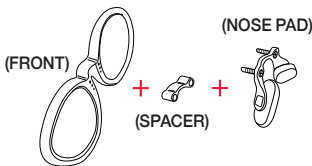

Sits 3mm higher (compared to A2)

A5

Sits 6mm higher (compared to A2)

Nose Pad Spacer Kit

CONTENTS

- ① 2mm / 2 set
- ② 3mm / 2 set
- ③ 4mm / 2 set

① 2mm type

② 3mm type

③ 4mm type

A specialized accessory solution designed to prevent eyelashes from touching the lenses or the lower frame from resting against the cheeks. Installed between the frame front and the nose pad, these spacers increase the distance between the eyes and the lenses (vertex distance).

Package Contents: 3 spacer sizes (2 mm · 3 mm · 4 mm) + securing screws + dedicated case

WHAT MATTERS MOST TO US

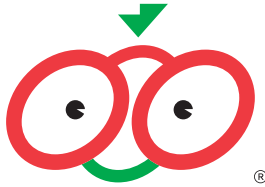

A great pair of glasses requires more than just premium materials. We believe true excellence is achieved only when thoughtful care and an unyielding attention to the smallest details come together. That is why, day after day, we continuously innovate to make our eyewear:

And above all, even more resistant to slipping. What we craft is simple: eyewear that the people you cherish most can wear with effortless comfort, every single day. That unwavering promise is built into every pair of Tomato Glasses today.

Optimal vision begins with glasses that stay perfectly in place.
